Placement Report 2013

LLM in International Business Law

“Unusual situations demand exceptional professionals”
The 2013 economic context meant a great challenge for IE Law School when it came to facilitating job opportunities for its LLM students. However, the overall approach of our LLM programs, which includes a business vision and an eminent practical nature, has provided our students with an important background that allows them to position themselves advantageously in the job market. This is demonstrated by the fact that 94% of our alumni are currently working, one percent higher compared to the results obtained last year.

Our LLM programs not only provide our students with solid legal knowledge, but students also develop skills and talents needed to succeed in the legal and tax sector. All of this is acknowledged and reinforced by the job market.

The Career Management Center at IE Law School goes to great lengths to maximize the careers of our students by organizing different activities with both students and law firms. Every year, a Career Fair is held at IE, bringing together the most prestigious law firms and allowing our students to establish ties with recruiters. This fair has once again been a successful opportunity for candidates and employers to meet and, as a result, 54% of the 2013 LLM alumni received a job offer at the time of their graduation.

This data reveals once more the trust recruiters have placed in IE Law School. Furthermore, new graduates are now added to a network comprised of more than 46,000 IE Alumni that carry out their activities in more than 80 countries in both the public and private sector, and in multinational companies, start-ups and family businesses, with the aim of creating value for the societies in which they work.
# Profile of the Graduates 2012-2013
