# A WORD FROM THE DEAN ▼

**Javier de Cendra**  
Dean IE Law School

IE Law School is known for its cutting-edge approach to legal education and for the excellence of its graduates. Being faithful to ourselves requires a constant commitment to innovation to help our students succeed in a rapidly changing world.

Legal practice is increasingly global, multidisciplinary and technological; the entrepreneurial movement is reshaping legal practice in extraordinary ways and global society faces challenges of special kind and consequence. Lawyers must be ready not just to adapt to these trends but also be able and willing to drive change.

To achieve that aim, our programs make sure that students develop the right set of core skills. A global mind-set can only be acquired if

students are confronted both with the need to solve complex, cross-border legal cases by working in multidisciplinary teams within the classroom and with real exposure to the practice of law. Developing an entrepreneurial spirit requires both mastering technical skills and applying them to real projects through a hands-on approach. The opportunities that the technology revolution brings can only be harnessed if students develop the right set of skills and learn how to apply them to make a difference in the practice of law.

This is why all our programmes, whether at undergraduate, postgraduate or executive education level, follow the same fundamental vision. We invite you to explore the school and experience how innovation drives the legal world.
