

Track #01

General Track

Track Description

The General Track welcomes those papers that do not fit with other tracks or have a very comprehensive, cross-thematic scope. The track considers papers on a wide range of IS topics involving various theoretical positions, methodological approaches, and domains of study. Please check the fit of your paper with other tracks' topics before submitting your paper to this track. Further, the General Track provides the co-chairs of other MCIS and MENACIS tracks the opportunity to submit their manuscripts.

Track Co-Chairs
